

- In June 2016, the indicator value of the KOF Economic Barometer continued to be above its historical average. It reached a value of 102,4 compared to 101,8 in May. Overall, the KOF Economic Barometer indicates a stable condition of the Swiss economy.
- The UBS Consumption Indicator rose to 1,35 points in May 2016 from 1,24, extending its positive month-on-month run. Private consumption sent a positive signal, increasing 2,8% on an annualized basis in the first quarter. It thus expanded much faster than in the previous quarter, and supported Swiss economic growth.
- Rounded correctly, the procure.ch Purchasing Managers' Index (PMI) declined by 4,3 points in June 2016 and closed at 51,6 points. The PMI thus closed above the growth threshold of 50 points for the seventh month in succession. On the positive side, the employment subindex has risen further and now lies in the growth zone again for the first time in one and a half years.
- According to SECO, in the end of June 2016, 139'127 unemployed were registered at regional unemployment offices, 5'651 less than in May 2016. The unemployment rate decreased from 3,2% in May to 3,1% in June. Compared to the same month in the previous year, unemployment raised by 5'871 persons (+4,4%).

KOF economic barometer

(5)

- The KOF Economic Barometer is a composite leading indicator for the Swiss economy. It comprises 219 variables which are combined based on statistically determined weights. It is one to two quarters ahead of the GDP growth rate of the previous year and thus enables an initial estimate to be made of how the Swiss economy will perform in the next or in the next two quarters.

- In June 2016, the indicator value of the KOF Economic Barometer continued to be above its historical average. It reached a value of 102,4 compared to 101,8 in May. Overall, the KOF Economic Barometer indicates a stable condition of the Swiss economy.

Source: KOF, SECO.

Private consumption, consumer sentiment and UBS consumption indicator

(6)

- The UBS Consumption Indicator rose to 1,35 points in May 2016 from 1,24, extending its positive month-on-month run. Private consumption sent a positive signal, increasing 2,8% on an annualized basis in the first quarter. It thus expanded much faster than in the previous quarter, and supported Swiss economic growth.

Real exchange rate indices, export-weighted

(23)

13.07.2016	Exchange rate
EUR	1.09
GBP	1.31
USD	0.99
JPY (100)	0.95

- The real external value of the Swiss Franc compared to the currencies of the most important trade partners of Switzerland is measured by the real export-weighted exchange rate index. It is often used as an indicator for the assessment of the price competitiveness of an economy. A fall in the exchange rate index means a depreciation of the Swiss Franc.

Source: SNB.

EUR/CHF and Purchasing-Power Parity (PPP)

(24)

31.05.2016	PPP
PPP	1.27

- The concept of purchasing-power parity (PPP) can be used to determinate the fair value of a currency. Purchasing-power parity exists when different currencies have the same purchasing-power due to the exchange rate and therefore the same basket of goods can be purchased with one unit of currency. If the EURCHF PPP is higher than the EURCHF exchange rate, the CHF is overvalued.
