

- SECO: The Federal Government's Expert Group is largely keeping to its previous assessment (from June 2016) and anticipates a GDP growth of 1.5% for full-year 2016. For 2017, the Expert Group expects an acceleration of GDP growth to 1,8%. This will likely lead to a gradual dissipation of the slight increase in unemployment that has been recorded since 2015. The unemployment rate is expected to settle at 3,3% (annual average) in 2016 and remain at this level in 2017 as well.
- KOF: The demand for Swiss goods and services is increasing slowly in the forecast period (2016 - 2018) on account of further recovery of the global economy. Switzerland's economy is returning to moderate growth, with GDP rising by 1,6% this year and 1,8% in 2017.
- The UBS Consumption Indicator rose to 1.53 points in August from 1.45. This development was fueled by resurging tourism and above-average car sales for the month.
- The procure.ch/Credit Suisse Purchasing Managers' Index (PMI) rose by 2,2 points in September and closed at 53.2 points. The PMI thus closed above the growth threshold of 50 points for the tenth month in succession and at its highest level since May.
- SECO: The unemployment rate holds in September at 3,2% (the increase with respect to the previous month was of 4'449 units)

Evolution of GDP (real) and unemployment rate

(4)

- The potential growth lies between 1,6% and 1,8%, according to calculations by Fahrländer Partner.

Note: The values for 2016 and 2017 are forecasts.
Note: Since June 2016, the unemployment rate is based on occupation numbers according to the pooling 2012-2014 (revised from January 2014).
Source: figure 1, page 1, Fahrländer Partner (growth potential).

KOF economic barometer

(5)

- The KOF Economic Barometer is a composite leading indicator for the Swiss economy. It comprises 219 variables which are combined based on statistically determined weights. It is one to two quarters ahead of the GDP growth rate of the previous year and thus enables an initial estimate to be made of how the Swiss economy will perform in the next or in the next two quarters.

- The KOF Economic Barometer, with a current reading of 101,3, increased 1,6 points in September 2016 (from revised 99,7 in August). Therefore, the Economic Barometer recovered from its fall below the 100 points level that was witnessed last month and climbs just above its long-term average.

Real exchange rate indices, export-weighted

(23)

20.10.2016	Exchange rate
EUR	1.09
GBP	1.22
USD	0.99
JPY (100)	0.96

- The real external value of the Swiss Franc compared to the currencies of the most important trade partners of Switzerland is measured by the real export-weighted exchange rate index. It is often used as an indicator for the assessment of the price competitiveness of an economy. A fall in the exchange rate index means a depreciation of the Swiss Franc.

Source: SNB.

EUR/CHF and Purchasing-Power Parity (PPP)

(24)

31.05.2016	PPP
PPP	1.27

- The concept of purchasing-power parity (PPP) can be used to determinate the fair value of a currency. Purchasing-power parity exists when different currencies have the same purchasing-power due to the exchange rate and therefore the same basket of goods can be purchased with one unit of currency. If the EURCHF PPP is higher than the EURCHF exchange rate, the CHF is overvalued.
