

- The Expert Group of the SECO maintains its previous assessment and anticipates a GDP growth of 1,5% for full-year 2016. It expects to see a modest acceleration of GDP growth to 1,8% in 2017 and 1,9% in 2018.
- KOF: Growth dynamics in the Swiss economy remain weak. Private consumption is restrained and the export industry is not regaining its former strength. In 2017, GDP is expected to rise by a modest 1,6%.
- In November 2016, the KOF Economic Barometer fell by 1,7 points (from revised 103,9 in October) to 102,2. The upward trend that could be observed since mid-2015 has thus not continued into the last month.
- In October, the UBS consumption indicator rose from 1,47 to 1,49 points. Positive developments in the automobile market and robust domestic tourism continue to support private consumption.
- The procure.ch/Credit Suisse Purchasing Managers' Index (PMI) rose for the fourth month in succession in November 2016 (+1.9%) and closed at 56,6 points, well within the growth zone and at its highest level since February 2014.
- In November 2016, the KOF Economic Barometer fell by 1,7 points (from revised 103,9 in October) to 102,2. The upward trend that could be observed since mid-2015 has thus not continued into the last month.
- Compared to September 2016, the conditional inflation forecast of the SNB has been revised in december 2016 slightly downwards in the short term. The SNB anticipates an unchanged inflation rate of -0,4% for 2016, for 2017 +0,1% (Sept.: +0,2%).

Evolution of GDP (real) and unemployment rate

(4)

- The potential growth lies between 1,6% and 1,8%, according to calculations by Fahländer Partner.

Note: The values for 2016 and 2017 are forecasts.  
Since June 2016, the unemployment rate is based on occupation numbers according to the pooling 2012-2014 (revised from January 2014).  
Source: figure 1, page 1, Fahländer Partner (growth potential).

KOF economic barometer

(5)

- The KOF Economic Barometer is a composite leading indicator for the Swiss economy. It comprises 219 variables which are combined based on statistically determined weights. It is one to two quarters ahead of the GDP growth rate of the previous year and thus enables an initial estimate to be made of how the Swiss economy will perform in the next or in the next two quarters.

- In November 2016, the KOF Economic Barometer fell by 1,7 points (from revised 103,9 in October) to 102,2. The upward trend that could be observed since mid-2015 has thus not continued into the last month.

Source: KOF, SECO.

Private consumption, consumer sentiment and UBS consumption indicator

(6)

- In October, the UBS consumption indicator rose from 1,47 to 1,49 points. Positive developments in the automobile market and robust domestic tourism continue to support private consumption.

### Changes in foreign trade: exports and imports

(21)

Note: The values for 2016 and 2017 are forecasts.  
Source: figure 3, page 1.

### Changes in exports to Germany, France, Italy, USA: contribution to growth in export volume

(22)

3rd quarter 2016	Change p.a.
Total exports	7.1%
Germany	11.0%
France	3.6%
Italy	-2.1%
USA	23.6%

Source: Swiss Customs Administration.

### Real exchange rate indices, export-weighted

(23)

14.12.2016	Exchange rate
EUR	1.07
GBP	1.28
USD	1.01
JPY (100)	0.88

- The real external value of the Swiss Franc compared to the currencies of the most important trade partners of Switzerland is measured by the real export-weighted exchange rate index. It is often used as an indicator for the assessment of the price competitiveness of an economy. A fall in the exchange rate index means a depreciation of the Swiss Franc.

Source: SNB.

### EUR/CHF and Purchasing-Power Parity (PPP)

(24)

31.10.2016	PPP
PPP	1.24

- The concept of purchasing-power parity (PPP) can be used to determinate the fair value of a currency. Purchasing-power parity exists when different currencies have the same purchasing-power due to the exchange rate and therefore the same basket of goods can be purchased with one unit of currency. If the EUR/CHF PPP is higher than the EUR/CHF exchange rate, the CHF is overvalued.
