

- SECO: The Federal Government's Expert Group expects the economy to continue its dynamic recovery and anticipates strong GDP growth of 2,4% in 2018. The buoyant international economy is supporting foreign trade, while a favourable investment climate is stimulating domestic demand. Amid a gradual slowdown in the global economy, GDP growth is expected to moderate to a solid 2,0% in 2019. The promising upturn is to be accompanied by a further noticeable brightening on the labour market and a moderate rise in inflation.
- KOF: The Swiss economy is currently on an upward trajectory. This year it will achieve a relatively high GDP growth rate of 2,5%, and KOF is forecasting fairly robust growth of 1,8% for 2019. KOF reckons that the main reasons for this positive trend are the improved economic situation of major trading partners and the depreciation of the Swiss franc against the euro.
- In March 2018, the procure.ch/Credit Suisse Purchasing Managers' Index (PMI) shed 5,2 points to close at 60,3 points. While it remains well within the growth zone, the index has reached its lowest level since last July. In general, the PMI tends to exhibit downward swings in spring that are not balanced out by seasonal adjustments.
- According to SECO, the unemployment rate decreased from 3,2% in February 2018 to 2,9% in March 2018.

Evolution of GDP (real) and unemployment rate

(4)

- The potential growth lies between 1,6% and 1,8%, according to calculations by Fahländer Partner.

Note: The values for 2018 and 2019 are forecasts.
Since June 2016, the unemployment rate is based on occupation numbers according to the pooling 2012-2014 (revised from January 2014).
Source: figure 1, page 1, Fahländer Partner (growth potential).

KOF economic barometer

(5)

- The KOF Economic Barometer is a composite leading indicator for the Swiss economy. It comprises 219 variables which are combined based on statistically determined weights. It is one to two quarters ahead of the GDP growth rate of the previous year and thus enables an initial estimate to be made of how the Swiss economy will perform in the next or in the next two quarters.

- In March 2018, the KOF Economic Barometer fell by 2,4 points to a new reading of 106,0. Notwithstanding this decline, the present position is still on a level clearly above its long-term average.

Source: KOF, SECO.

Private consumption and consumer sentiment

(6)

- SECO: Swiss consumer sentiment has improved. The overall index rose markedly in January 2018 and currently stands at 5 points, the highest level in seven years. Consumers' expectations are particularly more optimistic regarding the generaleconomic outlook and labour market prospects.

Real exchange rate indices, export-weighted

(23)

19.04.2018	Exchange rate
EUR	1.20
GBP	1.37
USD	0.97
JPY (100)	0.90

- The real external value of the Swiss Franc compared to the currencies of the most important trade partners of Switzerland is measured by the real export-weighted exchange rate index. It is often used as an indicator for the assessment of the price competitiveness of an economy. A fall in the exchange rate index means a depreciation of the Swiss Franc.

Source: SNB.

EUR/CHF and Purchasing-Power Parity (PPP)

(24)

31.12.2017	PPP
PPP	1.20

- The concept of purchasing-power parity (PPP) can be used to determinate the fair value of a currency. Purchasing-power parity exists when different currencies have the same purchasing-power due to the exchange rate and therefor the same basket of goods can be purchased with one unit of currency. If the EURCHF PPP is higher than the EURCHF exchange rate, the CHF is overvalued.
