

- In July 2018, the KOF Economic Barometer fell slightly to 101,1 points from 101,3 in June (first publication: 101,7). Negative indicators for manufacturing, the export industry and the accommodation and food service activities sector were mainly responsible for the slight decrease. Positive signals come from the banking and the construction sectors.
- Having suffered a marked decline, the consumer sentiment index from July 2018 stands at -7 points and is now close to its long-term average (-9 points). In the past quarters, Swiss consumers were much more optimistic about the general evolution of the economy.
- The procure.ch/Credit Suisse PMI rose (+0,3 index points) to 61,9 in July. The Swiss manufacturing sector therefore started the third quarter on a strong note, maintaining the dynamic pace of the previous quarter. The Swiss economy continues to benefit from solid growth in the Eurozone, which increases demand for Swiss goods.
- FCA: The growth trend in exports which has been registered since the beginning of 2017 continued without interruption in the second quarter of 2018. Exports thus rose to a new quarterly high - the fifth in a row. Meanwhile, after the steep rise in the previous quarters, imports took a short break at a high level. The trade balance showed a surplus of 4,6 billion Swiss francs.

5 KOF economic barometer

– In July 2018, the KOF Economic Barometer fell slightly to 101,1 points from 101,3 in June (first publication: 101,7). Negative indicators for manufacturing, the export industry and the accommodation and food service activities sector were mainly responsible for the slight decrease. Positive signals come from the banking and the construction sectors.

Note: The KOF Economic Barometer is a composite leading indicator for the Swiss economy. It comprises 219 variables which are combined based on statistically determined weights. It is one to two quarters ahead of the GDP growth rate of the previous year and thus enables an initial estimate to be made of how the Swiss economy will perform

Source: KOF, SECO.

6 Private consumption and consumer sentiment

– Having suffered a marked decline, the consumer sentiment index from July 2018 stands at -7 points and is now close to its long-term average (-9 points). In the past quarters, Swiss consumers were much more optimistic about the general evolution of the economy.

23 Real effective exchange rate index (CPI-based)

16.08.2018	Exchange rate
EUR	1.13
GBP	1.26
USD	0.99
JPY (100)	0.90

Note: The real effective exchange rate index measures the real external value of the Swiss franc, and is the nominal index adjusted for price developments in Switzerland and abroad. It is frequently used as an indicator for assessing the price competitiveness of an economy. A rise in the index value indicates a real appreciation in the Swiss franc. All of the real indices are also calculated on the basis of the producer price index (PPI).
Source: SNB.

24 EUR/CHF and Purchasing-Power Parity (PPP)

31.05.2018	PPP
PPP	1.21

Note: The concept of purchasing-power parity (PPP) can be used to determinate the fair value of a currency. Purchasing-power parity exists when different currencies have the same purchasing-power due to the exchange rate and therefore the same basket of goods can be purchased with one unit of currency. If the EURCHF PPP is higher than the EURCHF exchange rate, the CHF is overvalued.
